

MindEdge Cybersecurity Learning Opportunity

Cybersecurity, also known as Information Security, is the protection of data and personally identifiable information from malicious attacks and destruction.

Cybersecurity is one of the most critical issues affecting organizations and individuals today, from the government to families.

7 out of 10 organizations say their security risk increased significantly in 2017.

\$6T

The Cybersecurity community predicts that cyber crime damages will cost the world \$6 trillion annually by 2021, up from \$3 trillion in 2015.

Cybersecurity Training Delivers Value to Organizations

Less exposure to Cybersecurity risks

Lower costs due to lower frequency of cyber-related loss-incidents

Market edge over your business competition

Positive staff culture regarding Cyber and Information security

Why Cybersecurity Training?

For either advancement or changing careers, there are many reasons for Cybersecurity training, including a strong demand in the job market, the pay, the opportunities.

Job Outlook

It's predicted that 6 million cyber security professionals will be needed by 2019, and there will be 3.5 million unfilled cyber security jobs by 2021. In fact, the number of cyber security jobs is growing three times faster than other tech jobs.
